ABOUT ME

Biotechnologist with experience in data analysis, IT, and technical management. Skilled in advanced tools such as Excel, Power BI, SQL, Python, Docker, and GitHub. I have implemented automations and dashboards to integrate data on purchases, inventory, sales, and more. Known for my ability to work collaboratively, adapt to new challenges, and solve problems efficiently. I have completed studies in data analysis, Data Engineering, and clinical monitoring. My focus is on technical roles in the food and healthcare industries, aiming to improve processes through data management.

EDUCATION

Universidad Argentina de la Empresa (UADE)
Biotechnology| Graduate 2022

WORK EXPERIENCE

R-Biopharm Latinoamerica S.A. 2013 - Present

Data Analysis, 2022 - Present

- Design and maintenance of dashboards and visual reports for effective KPI analysis, facilitating business decision-making.
- Extraction and processing of data from various sources, such as databases and ERP systems, to obtain accurate and relevant information.
- Automation of reports and workflows, optimizing analysis and information generation processes.
- Generation of data-based insights to support strategic decision-making and improve organizational efficiency.
- Data quality control and information validation to ensure accuracy and reliability in the generated analyses and reports.

Purchases and Imports, 2016 - Present

- Negotiation with national and international suppliers to obtain the best commercial conditions and services.
- Management of purchase orders, supervising follow-up and deliveries to ensure customer satisfaction.
- Processing of import documents, ensuring their correct handling and compliance with legal requirements.
- Control of compliance with customs standards and international regulations to ensure legality in import/export operations.
- Evaluation and selection of strategic suppliers, based on quality, price and service criteria to optimize the supply chain.

IT Coordinator, 2019 - Present

- Maintenance and updating of computer systems and networks, ensuring their correct operation and performance.
- Management and resolution of technical incidents, providing fast and effective solutions to ensure operational continuity.
- Implementation of new technologies and business software to optimize processes and meet the technological needs of the organization.
- Server administration and computer security, protecting the infrastructure against internal and external threats.
- Configuration of hardware and software for users, guaranteeing an efficient and secure work environment.
- Monitoring of backups and data recovery, ensuring the availability of critical information in the event of incidents.

Logistic, 2016 - 2022

- Planning and optimizing transport routes, ensuring efficiency and cost reduction in logistics.
- Coordination of national and international shipments, guaranteeing the timely delivery of goods.
- Control and management of inventories in transit, monitoring the logistics chain to ensure its integrity.
- Negotiation with transport providers, obtaining the best conditions and services for the logistics operation.

Stock Analysis, 2016 - 2022

- Inventory monitoring and efficient storage management, ensuring accuracy and organization.
- Implementation of stock control systems to monitor and optimize product availability.
- Conducting physical inventories and accounting reconciliations to maintain record accuracy.
- Optimizing storage space, using solutions that maximize capacity and operational efficiency.
- Managing product inputs and outputs, ensuring efficient flow and compliance with established procedures.

Technical Service for Equipment, 2013 - Present

- Diagnosis and repair of technological equipment, ensuring its correct operation and performance.
- Training of clients and employees on the efficient use of equipment, promoting an optimized technological experience.
- Detailed documentation of repairs and updates, ensuring a clear and accessible record of all interventions carried out.

Sales Analyst, 2013 - 2016

- Personalized customer service and advice, guaranteeing their satisfaction and resolution of queries.
- Proactive search for new clients to expand the portfolio and generate new business opportunities.
- Preparation of detailed budgets and exhaustive monitoring of orders until their completion, ensuring their fulfillment.

COURSES

Data Science III: NLP & Deep Learning aplicado a Ciencia de Datos
Coderhouse, 2025

Data Science II: Machine Learning para la Ciencia de Datos
Coderhouse, 2025

Data Science I: Fundamentos para la Ciencia de Datos
Coderhouse, 2024

Big Data / Data Analytics
Buenos Aires Aprende(Codo a Codo/ Telento Tech), 2024

Business Analytics
Coderhouse, 2024

Data Engineering Flex
Coderhouse, 2023

CURSO DE FORMACIÓN DE MONITORES PARA ENSAYOS CLÍNICOS (Course for CRA)
PHASE SMO/CRO, 2023

SKILLS AND TOOLS

- Excel
- Word
- PowerPoint
- Goldmine
- Tango Gestion
- Photoshop
- Teams
- Python
- SQL
- Power Bi
- Google Looker
- Tableu
- Visual Studio Code
- Microsoft SQL Server Management
- Docker
- Github
